The fund aims to provide a level of income, before charges, above that available on UK Government bonds by investing predominantly in investment grade bonds. The fund is actively managed by our investment teams who may invest in a wide range of bonds (e.g. corporate bonds including sub investment grade bonds, overseas bonds, index-linked bonds, floating rate notes (FRNs) and asset backed securities (ABSs) and/or money market instruments) in order to take advantage of opportunities they have identified and which meet our strict ethical criteria. These criteria are agreed with the Standard Life Ethical Funds Advisory Group and may be amended from time to time if considered appropriate. The fund manager will exclude companies which fail to meet the ethical criteria whilst seeking to include companies whose business activities are regarded as making a positive contribution to society.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at low risk. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks. The value of assets held within the fund may rise and fall as a result of exchange rate fluctuations.

Definitions

The Underlying Yield takes account of all expected cash flows from a bond over its lifetime. This includes, in addition to coupons, any differences between the purchase cost of a bond and its final redemption amount. It reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the 15th of the month. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions. This is also the distribution yield for this fund. The Underlying Yield is based on the institutional shareclass.

Not Classified (N/C) may include bonds which do not fall into the specified categories and 'Cash and Other'.

Not Rated (N/R) may include bonds which do not have a rating under iBoxx classification (such bonds may still be rated by S&P and/or Moody's) and 'Cash and Other'.

Cash and Other - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
