

31 January 2019

The fund aims to provide a significantly higher level of income than that available on gilts by investing mainly in sterling and euro denominated sub-investment grade corporate bonds. The fund is actively managed by our investment team who may also invest in other bonds (such as investment grade corporate bonds and government bonds) to try to take advantage of the opportunities they have identified.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at low risk. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks. The value of assets held within the fund may rise and fall as a result of exchange rate fluctuations.

Fund Performance *

Price Indexed

The performance of the fund has been calculated over the stated period using bid to bid basis for a UK basic rate tax payer. The performance shown is based on an Annual Management Charge (AMC) of 0.60%. You may be investing in another shareclass with a higher AMC. The charges for different share classes are shown on the next page. For details of your actual charges please contact your financial adviser or refer to the product documentation.

Benchmark: Merrill Lynch Euro/GBP Fixed and Floating Non Financial High Yield 3% Constrained Index (hedged to £) replaced IMA Sterling High yield sector effective 1st April 2011. The base date of the current index benchmark is 31st December 2007.

Note: Past Performance is not a guide to future performance. The price of shares and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

For full details of the fund's objective, policy, investment and borrowing powers and details of the risks investors need to be aware of, please refer to the prospectus.

For a full description of those eligible to invest in each share class please refer to the relevant prospectus.

The fund does not have an index-tracking objective.

Definitions

The Underlying Yield takes account of all expected cash flows from a bond over its lifetime. This includes, in addition to coupons, any differences between the purchase cost of a bond and its final redemption amount. It reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the 15th of the month. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions. This is also the distribution yield for this fund. The Underlying Yield is based on the institutional shareclass.

Not Classified (N/C) may include bonds which do not fall into the specified categories and 'Cash and Other'.

Not Rated (N/R) may include bonds which do not have a rating under iBoxx classification (such bonds may still be rated by S&P and/or Moodys) and 'Cash and Other'.

Cash and Other - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.

Annual Management Charge	1.00%	0.60%	0.60%
Ongoing Charges Figure	1.03%	0.71%	0.76%

The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) shown above and the other expenses taken from the Fund over the last annual reporting period. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The OCF can help you compare the costs and expenses of different funds.
