

31 December 2018

The fund is invested in the Standard Life Investments Higher Income Fund which aims to provide a significantly higher level of income than that available on gilts by investing mainly in Sterling and Euro denominated sub-investment grade corporate bonds. The fund is actively managed by our investment team who may also invest in other bonds (such as investment grade corporate bonds and government bonds) to try to take advantage of the opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

Definitions

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.

Duration - gives an indication of a bond's sensitivity to a change in interest rates. It is based on a snapshot of the portfolio on specified date. It does not include any impact from charges.

Not Classified (N/C) may include bonds which do not fall into the specified categories and 'Cash and Other'.

Not Rated (N/R) may include bonds which do not have a rating under iBoxx classification (such bonds may still be rated by S&P and/or Moody's) and 'Cash and Other'.

Cash and Other - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
