

31 December 2018

The fund (before charges and tax) aims to track the performance of the S&P 500 Index, allowing for reinvestment of dividends. The fund invests in a broad spread of the US listed equities which are constituents of the S&P 500 Index. The return of the fund will be affected by exchange rate fluctuations.

Please note that the underlying assets in this fund are primarily managed by Vanguard Asset Management, a leading global provider of tracker funds, and this fund does not accept new investments.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate.

Pension Investment Fund

Definitions

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.
