

31 December 2018

The fund is invested in the Standard Life Investments Ethical Corporate Bond Fund which aims to provide a level of income, before charges, above that available on UK Government bonds by investing predominantly in investment grade bonds.

The fund is actively managed by our investment teams who may invest in a wide range of bonds (e.g. corporate bonds including sub investment grade bonds, overseas bonds, index-linked bonds, floating rate notes (FRNs) and asset backed securities (ABSs) and/or money market instruments) in order to take advantage of opportunities they have identified and which meet our strict ethical criteria. These criteria are agreed with the Standard Life Ethical Funds Advisory Group and may be amended from time to time if considered appropriate. The fund manager will exclude companies which fail to meet the ethical criteria whilst seeking to include companies whose business activities are regarded as making a positive contribution to society.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

Pension Investment Fund

Bond Fund

Quarterly

Fund Manager Mark Munro

Fund Manager Start 1 Mar 2014

Launch Date 5 Mar 2013

Current Fund Size £2.6m

Fund Code MMMC

Duration 7.8 years

Volatility Rating 3

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

Please note that the breakdowns below do not take into account the economic exposure created by derivative positions. The credit ratings shown below are the average of those from S&P, Moody's and Fitch.

Definitions

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.

Duration - gives an indication of a bond's sensitivity to a change in interest rates. It is based on a snapshot of the portfolio on specified date. It does not include any impact from charges.

Not Classified (N/C) may include bonds which do not fall into the specified categories and 'Cash and Other'.

Not Rated (N/R) may include bonds which do not have a rating under iBoxx classification (such bonds may still be rated by S&P and/or Moody's) and 'Cash and Other'.

Cash and Other - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
