

31 March 2020

The fund aims to provide long term growth mainly from the reinvestment of income generated by investing predominantly in Global Government Bonds, including those of the UK. The fund may also invest in Global Corporate Bonds and money market instruments such as Certificates of Deposits (CDs) and Floating Rate Notes (FRNs). The fund is actively managed by our investment team, who will select stocks to try to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The Sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

#### Definitions

**Volatility Rating (0-7)** - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

**Duration** - gives an indication of a bond's sensitivity to a change in interest rates. It is based on a snapshot of the portfolio on specified date. It does not include any impact from charges.

**Cash and Other** - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
