

31 December 2018

The fund is invested in the Standard Life Investments UK Equity Income Unconstrained Fund which aims to provide income and some capital growth over the longer term by investing in UK equities. The fund typically holds a concentrated portfolio of stocks and may also hold a proportion in bonds to supplement the income of the fund. The fund is actively managed by our investment team, who will select stocks, without reference to index weight or size, to try to take advantage of opportunities they have identified. Due to the unconstrained nature of the fund investors must be willing to accept a relatively high degree of stock specific risk.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

## Definitions

**Volatility Rating** - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.

**Cash and Other** - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
