

31 December 2018

The fund is invested in the Standard Life Investments UK Equity Recovery Fund which aims to provide long term capital growth by investing in UK equities. The fund is primarily invested in 'recovery' shares listed on the UK stock market and these will generally be companies of a large and medium size. The fund is actively managed by our investment team who will select stocks to try to take advantage of the opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate.

#### Definitions

**Volatility Rating** - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.

**Cash and Other** - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
